

Product Specifications

Medical keyboard with integrated touchpad and backlight

Model: D-87T

Main features

The all-rounder for low-light and darkened areas. This silicone keyboard is a simple mix of flat keys and a clinically white jacket. The keyboard also has a lot to offer from a technical point of view:

The gradual backlighting can be individually adjusted to the given lighting conditions and can be switched off via a separate key if required.

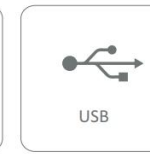

Completely sealed, the silicone keyboard can be immersed in liquids (IP68). The Tru-Lock mechanism also enables cleaning during operation.

A special feature is the additional LED dot on the caps lock button. If this key is pressed, the LED lights up green and informs the user that the permanent changeover to the alternate keypad assignment is switched on. This is particularly helpful when entering passwords.

Benefits:

- Built-in touchpad
- Backlight adjustable
- Fully sealed (IP68)
- Disinfectable
- Excellent tactile feedback
- Quiet - noiseless keystroke
- LED point for switched on Caps Lock key
- USB or PS/2
- With Mouse left and right button

Key lock:

Turn the key lock on or off by holding down the following key until the keyboard flashes:
